FACILITIES, GENERAL.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

The metal surfaces are pitted and rusted in the following areas: shift door framework between Tawnya & Filo/Tina enclosure, metal located on the lower portion of the cages on the back side, vertical metal support beam in Duke's cage.

The resting board in Tina's enclosure is splintered, and was exposed bolt heads. The wooden shift door in Tawnya/Filo enclosure is also splintered.

These surfaces may no longer be structurally sound, or may potentially injure an animal.

All surfaces shall be structurally sound and not cause injury.

Correct by: February 8, 2003

Note:

1-Elephant truck was in for repairs and not inspected.

2-Feline transport cages were also being repaired and not inspected.

3-The perimeter fence is being repaired. These repairs are scheduled to be completed by this evening.
